Florida Municipal Pension Trust Fund – DB 60% Equity Allocation
Executive Summary
As of September 30, 2019

60% Equity Allocation

- Despite the continued challenge that volatility has imposed on the global equity markets, they ultimately advanced in the third quarter with domestic large caps leading the way. While the 60% Equity Allocation struggled to keep up with the Target Index in the third quarter (up 0.6% vs up 1.0%), this allocation posted strong results fiscal year to date, outperforming the Target Index by nearly 60 basis points while ranking in the top 12th percentile of the public fund peer group.
- This allocation posted strong absolute results over the past 5 years (rising 6.8%), which modestly lags the target index (up 7.0%), but ranks in the top 23rd percentile of its peer group.
- Over the past 10 years, this allocation is up 8.1% on average annually. While this performance is slightly behind the target index, it modestly outpaces the performance of the peer group with the risk controlled nature of many of the underlying strategies providing downside protection should the markets moderate.

FMIvT Broad Market High Quality Bond Fund

- The Broad Market High Quality Bond Fund has minimal investment in the strongest performing sector, US Investment Grade Credit. Both the BloomBar US Aggregate A+ benchmark (14.5%) and the peer group of US Core Fixed Income managers (33.9%) have healthy allocations to this sector of the market. Despite its conservative allocation, the Broad Market High Quality Bond Fund (up 2.0%) nearly matched the performance of the benchmark (2.1%) in the third quarter, and has managed to outperform it over the past 3 years (2.7% vs. 2.6%).
- The portfolio's conservative risk profile and high quality bias are in line with the objectives for this fund. This bias has rewarded investors in the form of a more favorable relative risk-adjusted return comparison over the long-term.

FMIvT Core Plus Fixed Income Fund

- The Core Plus Fixed Income Fund had a difficult third quarter, falling 0.9% while the BloomBar Multiverse rose 0.6% primarily due to the funds' duration exposure to select emerging market countries (Argentina in particular). However, over the past 3 years, the fund has outpaced the benchmark by nearly 220 basis points and ranks in the top 45th percentile of the peer group of Global Unconstrained Fixed Income managers.
- In the 5 years since inception, the Core Plus Fixed Income Fund has posted absolute returns of 2.6% on average annually, outperforming the benchmark (up 2.1%) by nearly 50 basis points.
- The Core Plus Fixed Income Fund was added to the FMIvT lineup in April 2014 to provide broad global fixed income exposure, through equal allocation to two strategies (Amundi Pioneer Multi-Sector Fixed Income Fund and the Franklin Templeton Global Multi-Sector Plus Fund).

Florida Municipal Pension Trust Fund – DB 60% Equity Allocation
Executive Summary
As of September 30, 2019

FMLvT Diversified Large Cap Equity Portfolio

- The Diversified Large Cap Equity Portfolio was created in October 2017. The fund is allocated 60% to the Intech US Broad Equity Plus Fund, and 20% each to the Hotchkis & Wiley Diversified Value Fund and the Atlanta Capital High Quality Growth Fund. This fund provides investors with exposure to core, value, and growth opportunities within the US large cap equity space.
- This strategy continued to achieve strong results, rising 1.5%, modestly ahead of the Russell 1000 Index. Year to date, this fund has outpaced the benchmark by over 300 basis points while ranking in the top 14th percentile of the peer group of US Large Cap Core Equity managers.
- Despite the moderate headwind from the value exposure, this fund has posted strong results over the past year, rising 5.7% and ranking in the top 33rd percentile of its peer group. Exposure to US large cap growth stocks has been extremely additive over the most recent time periods with the Atlanta Capital High Quality Growth Fund posting the strongest 1 year results (up 19.2%) of all equity accounts in the FMLvT lineup.

FMLvT Diversified Small to Mid Cap Equity Fund

- Stout stock selection helped this strategy post the strongest results in the FMLvT lineup in the third quarter, achieving a 2.9% return, which outpaced the SMID Benchmark by 400 basis points. Over the past 5 years, the fund has outperformed the benchmark by nearly 750 basis points while ranking in the 2nd percentile of its peer group of US Small-Mid Cap Core Equity managers.
- This strategy has generated very strong results over the past 10 years, rising 16.8% on average annually compared with 12.1% for the benchmark. Furthermore, the fund ranked in the top 2nd percentile of its peer group, with a more modest risk profile and very strong risk-adjusted returns.

FMLvT International Equity Portfolio

- In October 2017, a ten percent allocation to emerging markets (Wells Capital Berkeley Street Emerging Markets Fund) was added to this portfolio.
- The volatility of the international markets posed some difficulties for the portfolio in the third quarter, as it fell 2.6% while the MSCI ACWI ex US only fell 1.7%. Despite these results, the fund has achieved nearly 170 basis points of excess return over the benchmark so far in 2019, and has outpaced the benchmark on an annualized basis over the past 5 years.
- This strategy is intended to provide strong diversification across the broad spectrum of equity markets outside the US, with exposure to both developed and emerging markets.

FMLvT Core Real Estate Portfolio

- This fund was added to the FMLvT lineup in March of 2018 with the objective to provide broad exposure to the core commercial real estate markets.
- In June 2018, the manager (Morgan Stanley Prime Property Fund) called down an additional commitment of \$75 million which increases the total commitment thus far to \$100 million.
- The FMLvT Core Real Estate Portfolio (up 1.7%) outperformed the NFI ODCE Net benchmark (up 1.1%) in the third quarter, and has outpaced the benchmark by 320 basis points over the past year.

Total Portfolio Historical Manager Allocation

January 1998: Initial allocation to Broad Market HQ Bond and HQ Growth Equity only.

January 2000: Added exposure to Small Cap markets and passive Large Cap.

February 2004: Increased equity portfolio exposure through reduction in the Broad Market HQ Bond Fund.

May 2005: Added International exposure; increased the Large Core allocation to reduce the Fund's growth bias.

November 2006: Added Large Cap Value allocation to balance the style exposure.

April 2014: Added Core Plus Fixed Income.

October 2017: FMlvt Diversified Large Cap Equity Portfolio was created, which combines the large cap core, value, and growth portfolios.

March 2018: Added Core Real Estate Portfolio.

- ¹ Market values and Total Portfolio performance includes all fees and expenses. Beginning July 2008 and ending September 2010, the net of fee performance includes the impact of securities lending activity, which may increase or decrease the total expenses of the portfolio.
- ² Target Index: Effective October 2017, the index consists of 30.0% BloomBar US Aggregate, 34.0% S&P 500, 11.0% Russell 2500, 15.0% MSCI ACWI ex US, 10.0% NFI ODCE Net.
- ³ The performance inception date of the FMIvT Core Plus Fixed Income Fund is 4/1/2014.
- ⁴ Represents the FMPTF Large Cap Equity Composite net of fees returns.
- ⁵ Custom Index consists of the Russell 2500 beginning June 1, 2010 and prior to that the Russell 2000.
- ⁶ SMID Benchmark: Effective June 2010, the index consists of 100% Russell 2500.
- ⁷ Wells Capital EM was added to the portfolio in October 2017. Portfolio renamed and manager changed in October 2014 and April 2011.
- ⁸ The performance inception date of the FMIvT Core Real Estate Portfolio is 4/1/2018.

FYTD: Fiscal year ending September.

* Net of fee return data.

Florida Municipal Investment Trust
Protecting Florida Investment Act - Quarterly Disclosure
As of September 30, 2019

This Disclosure is intended to provide information with respect to Chapter 175 and 185 Police and Fire Plan's required disclosure of direct or indirect holdings in any "scrutinized companies" as defined in the FSBA PFIA Quarterly Report for Quarter 3 2019.

It is important to note that individual Police and Fire Plans have no direct interests in any scrutinized companies. Police and Fire Plans hold an interest in the Florida Municipal Pension Trust Fund. It is also important to note that the Florida Municipal Pension Trust Fund has no direct interests in any scrutinized companies as all of its interests are invested in the Florida Municipal Investment Trust.

The Florida Municipal Investment Trust is the only entity that could possibly have direct interests in any scrutinized companies. ACG has reviewed the **Protecting Florida's Investments Act (PFIA) Quarterly Report- September 24, 2019** that is available on the Florida SBA website. In particular we have reviewed the list of companies appearing in **Tables 1 and 3- Scrutinized Companies with Activities in Sudan and Iran**, and compared these lists to securities of companies held directly by the Florida Municipal Investment Trust. As of 9/30/19, the Florida Municipal Investment Trust had no direct interest in securities on the above referenced lists.

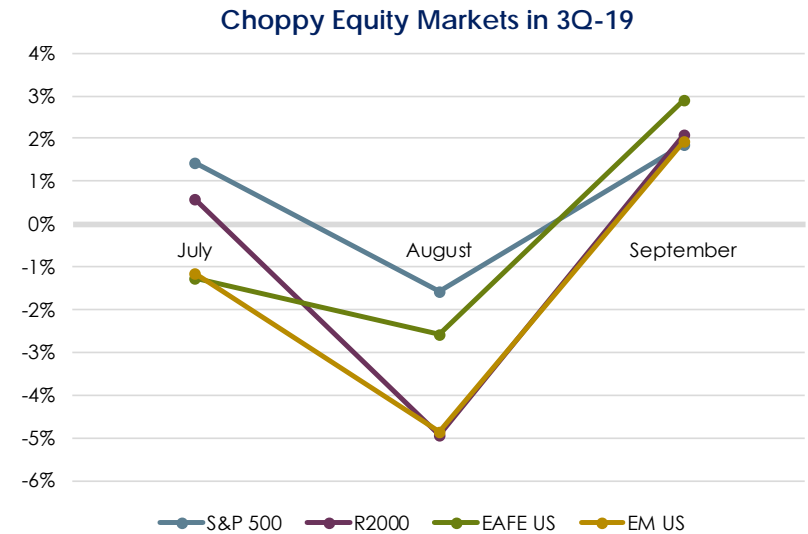

ACG also requested that investment managers, who manage commingled funds that are owned by the Florida Municipal Investment Trust, review the **Protecting Florida's Investments Act (PFIA) Quarterly Report- September 24, 2019** and disclose whether the Florida Municipal Investment Trust may hold any scrutinized companies indirectly through investment in their respective commingled funds. The Florida Municipal Pension Trust holds units in the FMIvT International Equity Portfolio. The FMIvT International Equity Portfolio owns units in the Wells Fargo Emerging Markets Large-Mid Cap Equity Fund. The Wells Fargo Emerging Markets Large-Mid Cap Equity Fund holds **CNOOC Ltd**, which represents 1.20 % of their portion of the FMIvT International Equity Portfolio. All other managers have confirmed that they do not hold any of these securities.

Global Long-Only Equity

Global equities were relatively muted in 3Q-19, with only a 10 bps advance for the MSCI ACWI measured in US dollar terms. However, **volatility remains heightened** as headlines shook the markets with ongoing announcements around US/China trade tensions, global economic slowdown fears, declining global bond yields, and an uptick in political chatter as the US prepares for next year's election. Investors ultimately moved from the risk-on mentality present in July to a risk-off mentality through the remainder of the quarter. Global markets did rebound somewhat in September as hopes of easing trade tensions and more accommodative global monetary policies surfaced, but as the market maintained its risk-off nature we witnessed Value surge ahead of Growth.

Domestic Large Caps advanced, with the S&P 500 returning 1.7% in 3Q-19 as September performance effectively pulled the index back into positive territory. Small Caps declined -2.4% in the quarter as investors looked for safe havens in larger peers. With three quarters behind us, Large Caps lead with a YTD gain of 20.6% versus a gain of 14.2% in Small Caps.

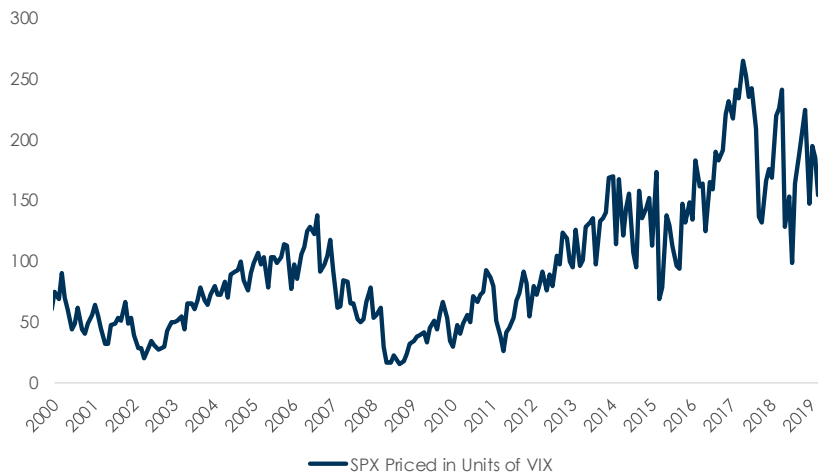

International Market advances were stymied by monetary policy and global growth concerns, which also resulted in a stronger US dollar providing a headwind to domestic investors. **Developed International markets declined** -1.0% in the quarter, with most countries tallying losses and a roughly 250 bps currency headwind. **Directionally, a similar outcome was observed in Emerging Markets**, but the magnitude of the decline was greater, falling -4.1% after accounting for a roughly 220 bps unfavorable currency impact.

Sources: Bloomberg, ACG Research

Global Long/Short Equity

S&P Index Priced in Units of VIX

Sources: Bloomberg, ACG Research

Volatility in the market (both positive and negative) **continued** during 3Q-19. The S&P priced in units of volatility (VIX), though 6% lower than 2Q, remains 86% higher than year end 2018 and higher than any period prior to 2016. With heightened macro impacts we anticipate this **higher volatility to continue to be the norm** for the foreseeable future. All else being equal, an increase in market **volatility helps generate opportunities** on both the long and short side so equity long/short managers stand to benefit.

Equity long/short managers have **decreased exposure due to macro concerns** surrounding interest rates, trade wars and the new risk of impeachment proceedings. This is reflected by **net exposures** that are near the lowest point since 2010. Managers remain optimistic about the outlook for companies but are **increasingly concerned about market uncertainty**.

Style exposure was a major contributor to 3Q performance as **momentum/growth unwound** in September in favor of value. Managers with significant exposure to growth sectors of **technology and health care underperformed**. The most **crowded trades also underperformed**, partially due to overlap with tech and health care.

Global **positioning remains tilted towards the US** as European exposures decreased to the lowest since 2010 due to Brexit and other geopolitical concerns. Asia exposure has stayed near historic averages but the mix has shifted to predominantly China as **Japan and Hong Kong exposures are near historic lows**.

Global Private Equity

LBO purchase price multiples spiked up over the summer to all time highs. Private equity sponsors appear to have taken the brunt of the price increase as the amount of debt provided by leveraged lenders increased only marginally in spite of **purchase prices moving up a full turn to 12.7x EBITDA on average**. Purchase prices for the three months ending August 31st were a turn higher than the average for the year, two turns of EBITDA higher than the average for 2018, and three turns higher than the last cyclical peak in 2007.

The US IPO market was on a tear for most of 2019 with a run of headline companies including Uber, Zoom and Pinterest making their public debuts. And then came WeWork. Although the spectacular end to their IPO bid appears closely tied to the market's negative perception of former-CEO Adam Neumann, potential IPO investors also made note of the initially sky-high valuation and ongoing operating losses. Despite WeWork's misstep, and barring another major setback, **2019 appears to be on track to deliver the best IPO market of the past five years**. If recent volatility or other market action closes the IPO window, private investors need not worry. **Later stage focused venture and growth funds continue to provide record levels of capital support to private companies**. In the first half of the year, 123 fundraising mega-rounds of \$100 million or more were completed compared to 36 for all of 2013.

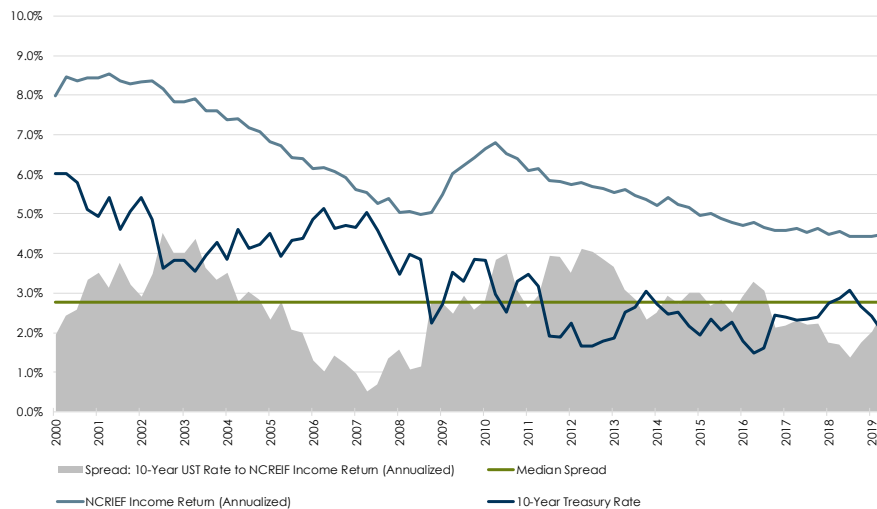

Purchase Multiples and Leverage Remain Elevated

Global Real Assets

NCREIF Income Return Spread to Treasuries

Sources: NCREIF, ACG Research

The NCREIF Property Index (NPI) posted its 37th consecutive quarter of positive appreciation in 2Q-19. This is 15 quarters longer than the second longest winning streak since the benchmark's inception in 1978. In 2Q-19, NCREIF annualized income returns (a proxy for cap rates) rose marginally to 4.5%. Broadly speaking, **fundamentals remain strong with the NPI occupancy level increasing to 94.3%, the highest level since 2000**, and income returns rising. In contrast, the trend of slowing appreciation returns became even more pronounced in the second quarter as the **retail sector weighed heavily on results**. Enclosed malls were particularly hard hit as values declined a whopping 4.2% for the quarter. Open-air retail assets declined 1.4%. Retail's large decline pulled the NPI appreciation return down to 0.4% for the quarter and the ODCE index was essentially flat for the same period.

Outside the retail sector, the story was much brighter with returns for all other property types moving higher in 2Q. **Industrial assets remain the beneficiary of retail's losses and the only NPI sector with double digit gains over the trailing 1-, 3-, 5- and 10-year periods**. Income and appreciation in the apartment and office sectors remain positive, even as hotels joined retail with negative appreciation in the quarter.

The Bloomberg Commodity Index (BCOM) fell -1.8% in 3Q-19, underperforming the BloomBar US Aggregate Bond Index by 4.1%, the S&P 500 by 3.5%, and the MSCI ACWI by 1.9%. **Any signs of rising inflation may be positive for commodities broadly, though growing concerns regarding slowing global economic growth, the strength of the US dollar, and trade tensions may drive continued volatility in the near term.**

Global Traditional Bond Markets

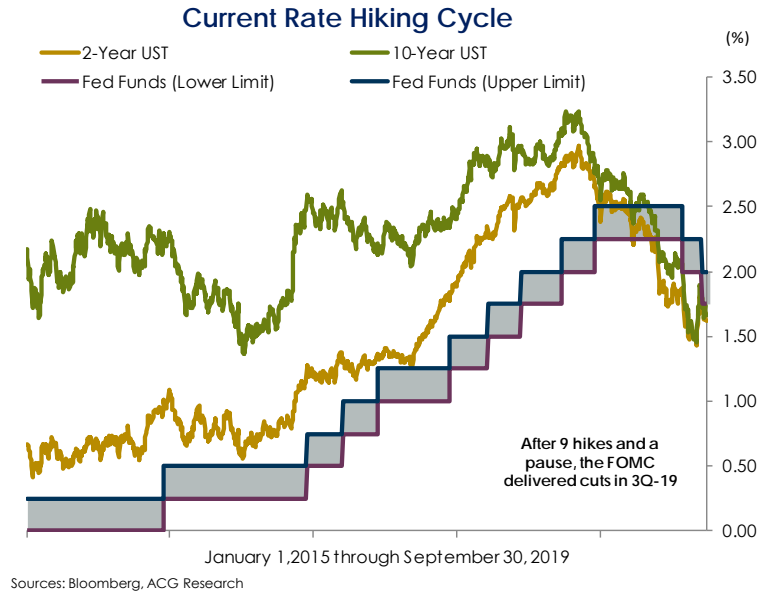

Amid heightened geopolitical noise in 3Q-19, the rally in risk-free rates was extended while income from lower-quality credit sustained positive performance. The **Federal Reserve** took action in both July and September, cutting short-term interest rates to a targeted range of 1.75% to 2.00%. The Committee's latest projections suggests the "mid-cycle adjustment" may be complete, even as the futures market is pricing in further cuts over the next 12 months. **The US Treasury yield curve (10's - 2's) ended flatter after briefly inverting.**

Given its high sensitivity to domestic interest rates, the **BloomBar US Aggregate** continued to outpace expectations. Total returns for the quarter were solid at 2.3%, with IG corporate credit a top contributor given stable spreads. The benchmark's yield-to-worst contracted by another 23 bps in the period, settling below 2.3% for the first time since October-2016.

Despite a brief interruption in investor risk appetite in August, the **High Yield** bond category managed positive performance in 3Q-19. Spreads tightened by only ~4 bps at the index level, but the focus on liquidity led to the ongoing underperformance of CCC-rated issues.

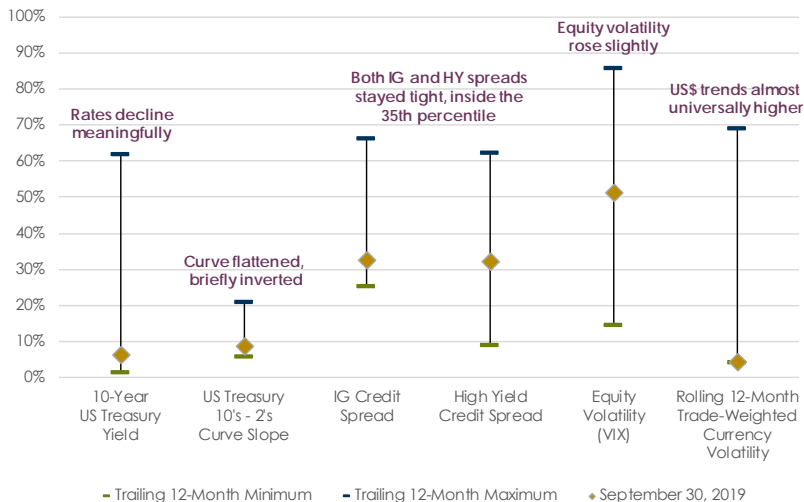

Municipal Bonds were solidly positive, despite lagging taxable counterparts as US Treasury rates moved lower. Robust demand for income caused the tax-exempt yield curve to flatten, with 10-year yield ratios of ~88% improving further from historically rich levels.

Unhedged Global government bonds underperformed with the drag of a strong US dollar offsetting the benefit of lower-trending yields. **Emerging Market** outcomes were mixed.

Global Nontraditional Fixed Income

Percentile Rankings of Observations for Past 15-Years

Sources: Bloomberg, ACG Research

Liquid Absolute Return strategies produced more muted results in 3Q-19, with the willingness to tactically assume modest portfolio duration alongside diversified credit exposures defining outperformers. That said, the rally in US Treasuries again prevented the category from keeping pace with traditional bond benchmarks. We continue to believe the diversification of risk factors within portfolios remains valuable, as this aids in downside protection and reduces key correlations. **Outperforming risk-free cash becomes easier as policy rates head lower, and enhanced volatility in rates, spreads, and currency should provide alpha opportunities.**

Long/Short Credit strategies were challenged over the summer as defensively positioned portfolios were not rewarded and some widely held event-driven positions experienced declines. The YTD performance dispersion between high yield bonds and loans has weighed on results as **loan-heavy portfolios haven't captured the full tailwind of the high yield market.** Long/short credit strategies typically have limited interest rate sensitivity and accordingly little participation in duration-based market movements. We expect idiosyncratic relative value situations will be more likely to add value than directional positioning in the near term.

Private Credit strategies (typically 5- to 10-year fund life) offer the opportunity to earn both a credit spread and an illiquidity premium versus publicly traded fixed income strategies. **3Q-19 saw a surge in supply in the leveraged loan market** as more than \$40 billion of loans were launched into syndication, the busiest month this year. Spreads tightened for the more highly rated BB new issues while those rated single B widened, likely an indicator of continued risk aversion from buyers.
