

Shed Anchoring System

Your storage building must be anchored to prevent wind damage. If you do not have an anchoring kit provided with your shed, the following anchoring kit is recommended for use with any shed.

Arrow Anchoring Kit: Model No. AK4 or 60298

Anchor Kit contains heavy-duty steel augers, 60' (18m) of steel cable and 4 cable clamps. No digging or concrete pouring, just insert cable under roof, over roof beams, into augers and twist augers into the ground. For buildings larger than 10'x9', use 2 kits.
