The purpose of these programs is to:

- a) Instill in residents a sense of pride and ownership of how our community looks;
- b) Provide an opportunity for local groups and organizations to make their presence known.
- c) Provide supplemental clean-up along our trails, waterways, roads and parks.

KEEP OUR  
COMMUNITY  
BEAUTIFUL!

The Adopt-A-Park, Trail, Shoreline, and Road programs are sustained by the powerful efforts members of our community make.

By adopting a Park, Trail, Shoreline, and/or Road, in your name, you can make a positive impact on the places that mean the most to you, and take part in being rooted to nature.

Local groups, private citizens, and supervised youth organizations are invited to show their exemplary abilities to help our community through litter cleanup and other minimal maintenance.

Help keep Palm Coast a BEAUTIFUL place for all to live!

Palm Coast

ADOPT A  
PARK, TRAIL,  
SHORELINE, OR ROAD

# What can be adopted?

Please make sure that any  
 recyclables you find   
make it into the correct bin.

Without your help these items are just

## SHORELINES

Track and collect the litter along the City's major outlets to the ocean, including:

Long Creek Nature Preserve

and

Waterfront Park.

If you use a boat, kayak or canoe you can have access more areas where floating debris is present.

Any fishing line found should be placed in a separate bag for recycling or in a fishing line recycling container.

Awareness of wildlife, such as snakes and alligators, is required to ensure your safety.

## PARKS

**Palm Coast has 14 City parks!**

Adoption opportunities in these green spaces include litter pickup, and general policing to report vandalism, broken play equipment, etc. for correction by City staff.

Any planting work, bench dedication or planned tree or shrub trimming must be pre-approved by City staff.

## ROADS

Roadways available for adoption are mainly major parkways and roadways where homes and businesses do not front the roadway's rights-of-way.

SR100, US1 and similar roads are not City-owned. These roads are not adoptable.

The main objective is litter removal. Tires, batteries, broken glass, road debris or large objects blocking the roadway should be reported to the City for removal.

Avoid roadside ditches with tall grass, as you may find snakes.  
**Volunteers should put safety first!**

## TRAILS

The City of Palm Coast has over 125 miles of trails!

Litter collection along the trails is needed to keep them looking as attractive as possible.

Trails may also have small branches, palm fronds or erosion issues. The group can throw small branches to the side, but large branches or erosion should be reported to the City for correction.

## BENCHES

Flowers are planted with the benches along stretches of City trails and parks.

Here, weeding, plant replacement and minor tree trimming is needed.
