Helping the Recovery of Monarch Butterflies

The Monarch City USA helps the monarch butterfly recover, city by city.

The City of Palm Coast has taken part in the nation-wide commitment to help in the recovery of the Monarch Butterflies. Currently, The City of Palm Coast is among 17 municipalities in the State of Florida who have made their commitment to Monarch City USA. In conjunction with Palm Coast's May 7, 2022 Arbor Day event this year, residents will be able to participate in a Monarch Butterfly release to commemorate the City's achievement.

In addition, Monarch City signs will soon be installed throughout Palm Coast roadways. A total of 9 signs declaring Palm Coast as Monarch City USA will be installed using street poles recognizing the city for proudly being Tree City USA as well. Installation for Monarch City signs will be completed by the end of spring by our very own Public Works Department.

Pictured: Monarch City USA Founder Russ Stubbles and his wife, Beverly, with their grandson.

Nearly a billion monarch butterflies have vanished since 1990, according to data released by the U.S. Fish and Wildlife Service in February 2015. Monarchs rely on the milkweed plants and nectar plants for their food and home. These plants are increasingly vanishing all across America.

Monarch City USA, created in 2015 in Maple Valley, Washington, encourages America's 19,000 plus municipalities to directly help the monarch butterfly population recover by encouraging and planting milkweed and nectar plants within their boundaries. Of course, if the municipalities do this the monarchs will have stepping stones as stopovers on their journeys.

We look forward to furthering our commitment efforts to the Monarch City USA Foundation and strengthening the community efforts of Monarch Butterfly awareness and education as a whole.

Message from the Mayor

'Looking at our future together'

2022 is already shaping up to be quite a year for our city for many reasons, perhaps none more noteworthy than the recent appointment of our new City Manager Denise Bevan in February. It is with great pride that the City Council and I unanimously approved the hiring of Ms. Bevan as our City Manager. I have no doubt that her integrity, steadfast nature, and many years of well-earned institutional knowledge amassed as valued employee and displayed while serving as Interim City Manager will provide great pillars to support our future vision for the City of Palm Coast.

With our future vision in mind, I want to take the opportunity to invite you all to our 2022 State of the City address that is quickly approaching on April 21 at 5:30 p.m. at the Palm Coast Community Center. This very special event will highlight the city and all that we have to offer as we look forward to smartly managed growth and sustainability following an unprecedented two years living in the midst of a pandemic.

Residents will be able to take part in this free event in-person by reserving a seat at: parksandrec.fun and selecting "State of the City" under the Special Events tab. Since seating is limited, we ask that you register in advance.

For those that are unable to attend in person, we will be live streaming the entire event online, and you can watch it at your leisure. I encourage all residents to listen to this presentation that promises to be as informative as it is fun and engaging.

Whether it is updating and enhancing our City infrastructure, or finding creative ways to manage our growth while staying true to what makes Palm Coast a great place to live, the hardworking employees of the City are laser focused on maintaining the incredible quality of life that we all enjoy here

PLEDGE TO BE LOCAL BUY LOCAL EAT. SHOP. SPEND.

EAT. SHOP. SPEND.

Be Local Buy Local in Palm Coast!
Make an impact on our community by committing to EAT, SHOP, and SPEND as much as possible in Palm Coast

TAKE THE PLEDGE

City Council Appoints Denise Bevan as City Manager

A familiar face will keep the top leadership position at the City of Palm Coast. At the February 15 City Council meeting, all five councilmembers voted unanimously to appoint Denise Bevan to the role of Palm Coast City Manager. She has served as the Interim City Manager since June of 2021.

Ms. Bevan assumes her new role with nearly 15 years of experience at the City of Palm Coast. As the city's Chief of Staff over Infrastructure, she was tasked with overseeing the Public Works, Utilities, Stormwater and Community Development departments.

Prior to that, she held the role of Senior Environmental Planner and City Administration Coordinator where she facilitated opportunities to enhance the environment and quality of life for Palm Coast citizens through educational outreach, land management, in-house services, conservation initiatives and regulatory oversight. She also coordinated the City of Palm Coast's sustainability initiatives and the Strategic Action Plan process that supports and implements City Council's Goals.

Bevan holds a Bachelor of Science degree with a focus in Ecology and minor in English from Jacksonville State University.

"I appreciate the trust and support from the Mayor and our City Council members to appoint me to this position. I am truly honored," Ms. Bevan said. "Serving the citizens of Palm Coast and working alongside our incredible team for the past 15 years has allowed me to truly develop a passion to make the City of Palm Coast the best place to enjoy from all facets of life. I'm excited to work alongside my team to continue to provide the highest level of service to our citizens."

The city manager is responsible for managing city operations, the city's annual budget, preparing city council agendas, implementing policies and appointing most city employees, among other responsibilities.

Reduce Mosquitoes in Your Environment

There are over 80 different species of mosquitoes known to occur in Florida. Some are pests; some transmit pathogens that cause disease. Here are a few that feed on humans: Yellow Fever, Asian Tiger, Southern House, Black Salt Marsh, and Gallinipper Mosquitoes.

Source Reduction is the most important technique that homeowners can employ to reduce mosquitoes. Since mosquitoes need water to live, removing water sources around the home goes a long way to prevent mosquitoes from occurring, as well as following these guidelines from East Flagler Mosquito Control:

- Relocate water holders such as rain barrels when not in use. Modifying rain barrels can help prevent mosquitoes from laying - add screening to the top to prevent mosquitoes from laying eggs, or cover the rain barrel with a lid.
- Properly dispose of water-holding containers such as discarded cans, bottles, and buckets.
- Flush out containers, such as bird baths and bromeliad plants, every three to four days during the summer.
- Clean up vegetation that has fallen from trees. Areca palm fronds, for example, hold water when they are on the ground.
- Remove/Dispose used tires to a local facility that will accept them.
- Dispose of old appliances that are sitting outdoors.
- Clean out roof gutters to remove leaves that may clog the drain and cause water to be retained.
- Check for and repair leaky faucets.
- Check for standing water in your yard, areas that may pool and remain after rainfall events. Make sure these areas can drain well.
- Aerate Water gardens and ornamental ponds, or stock with fish to reduce mosquito populations.
- Repair torn window and door screens to exclude mosquitoes from indoors.
- Fans can be used to keep mosquitoes away as Mosquitoes are weak flyers.
- Organize community efforts to help everyone locate and remove sources of water where mosquitoes can live.

The East Flagler Mosquito Control District is proud to be celebrating 70 years of service to the community!
